IMS Upgrade Project: Phase 1
May 2010

- The new IMS system, Symphony, has been well received since its initial implementation in CBE libraries in mid-February.
- Many of the issues associated with the migration have been resolved.
- In April an IMS “first” was achieved. Schools were able to order from the Recommended Resources online, using the Acquisitions module of Symphony. This will speed up the ordering cycle and result in schools receiving resources faster.
- [e-Library](#) is our current focus. We hope to have authenticated logins soon and to continue the customization of e-Library for CBE schools.
