**Inclusive Learning Technologies Initiative**  
May 2010

---

The Inclusive Learning Technologies Initiative involves the exploration of new and emerging technologies in supporting the diverse learning needs of all students. In Year One of this initiative, the potential of technology in supporting students in specialized programs was explored in schools with Bridges and Gifted & Talented programs. Deployment of resources and on-going professional development in the integration of the new technologies into the specialized programs and in supporting all students within the school has been the focus.
